DTAA STRATEGIC PLAN 2020-2022

Goals of the DTAA:

The constitution states that the primary objectives of the DTAA are the ongoing development and promotion of the art, science and practice of dance movement therapy (DMT) in order to promote better health, well-being, and creativity for people throughout Australasia; and the improved quality and reach of dance movement therapy for a broad range of populations.

Values

This document reflects the following values which underpin the work of the DTAA and our DMTs.

1. With regard to its practicing members, the DTAA encourages adherence to the following values which are core to human growth, development, health and well-being:
 - Bodily knowledge
 - Relational embodied movement experiences
 - Creativity
 - Expression
2. With regard to its organization operations, DTAA adheres to the following values for:
 - Operations and Administration: efficiency and effectiveness
 - Governance: transparency, accountability, responsiveness, fair conduct
 - Members: client focus, self-reflection, self-awareness, integrity, competence, respectful of diversity of human experience
 - Profession: human rights, equity, justice, empowerment

Background to the Strategic Plan:

The DTAA's Executive and Board have identified possibilities and opportunities as well as concerns and challenges. They are as follows:

The opportunities and positives:

- The opportunities and need for DMT services have never been greater: (modest) research and our experience indicate that many groups in the community benefit from this work.
- Current DM therapists and those joining the profession are deeply committed to the work
- Some research and publishing are being done by Australasian practitioners to expand the evidence base and inform the work.
- The DTAA continues to work actively to support the profession, running supervision and PD events, publishing informal and formal information and offering networking opportunities to the profession.
- The increasing awareness and interest by the scientific and other communities in embodied practices offers opportunities for greater collaboration across disciplines and professions
- The diversity of populations who experience challenges with verbal language open the need for working nonverbally in therapeutic settings
- The growing awareness of the role of creativity and expression for well-being offers a greater place for DMT
- The growing importance of diverse cultural practices for health and well-being offer space for DMT
- The availability of technology enables improved outreach by, and access to, DMT

The challenges:

- DMT practitioners need to meet the diverse community in Australasia, which include: young people, men, and people of CALD and indigenous background.
- DMT practitioners find it difficult to sustain a living because of lack of employment opportunities.
- There is a lack of recognition about DMT by decision makers, funders, other professions and the general public.
- There is a lack of recognition of DMT within the health and well-being space.
- The number of Professional DMT members is insufficient to meet demands across Australasia.

Objectives and Activities

In order to address these challenges, the Board of the DTAA aligns our activities with our organizations' two major Objectives:

- **Objective 1.** Improved quality of DMT work
- **Objective 2.** Expanded reach of DMT services

The specific activities will be outlined in the following Strategic Plan document. And they will be achieved through the work of the Board which consists of the Executive (E), headed by the President.

Governance Committee (GC), headed by the Secretary;
Ethics Committee (EC), headed by the Vice President;
Finance Committee (FC), headed by the Treasurer;
Professional Membership Committee (PMC), headed by the Convener;
Professional Development Committee (PDC) headed by the Convener;
Publications Committee (PC) headed by the Convener;
Research Committee (RC) headed by the Convener;
Marketing and Promotions Committee (MPC) headed by the Convener;
Workforce Development Committee (WDC) headed by the Convener;
Training and Education Committee (TEC) headed by the Convener;
Supervision Committee (SC) headed by the Convener;
Training Organizations Committee (TOC) headed by the Convener;
HEMF Committee (HC) headed by the Convener;
Competency Standards Sub Committee
Administrator
Bookkeeper
