Hanny Exiner Memorial Foundation (HEMF)
Research in Dance Therapy

Invites expressions of interest in purchasing a copy of Dance Therapy Redefined: A Body Approach to Therapeutic Dance

We are seeking expressions of interest in purchasing a copy of the book *Dance Therapy Redefined*, by Hanny Exiner and Denis Kelynack. Published in 1994, this is an important publication in terms of Dance Movement Therapy development and history in Australasia and deserves to be read by the current generation of dance movement therapists.

The book has been out of print for some time, and it is very difficult now to find even second-hand copies online. Following discussions at a recent HEMF meeting it was decided to try and rectify this situation. The book is still under copyright of Publishers Charles C. Thomas, Pub. Ltd, Springfield USA who are willing to do a special very small print run for our Australasian

Dance Movement Therapy community. It would help us gauge numbers to order, if anyone interested in purchasing a copy, could let us know. You would not be under any obligation to purchase.

To the many new members of our Australasian Dance Movement Therapy community: Johanna (Hanny) Exiner was one of the great influences in the development of dance movement therapy in Australia. Many of those who worked in the field learnt from Hanny not only many valuable skills and insights about dance as therapy but also, most essentially, about the nature of dance itself. In 1997, when she opened the Dance Therapy Conference, in Melbourne, she spoke of her implicit beliefs in the aesthetic experience of dance itself as a powerful and healing tool.

For more about the book see:
